

Others say, “Why???”

“Why do you want to make that?”

“Why do you enjoy that geeky stuff?”

“Why did you take that apart?”

“Why can’t you just buy a computer at the store?”

“Why are you so weird?”

We say, “And...”

“You could add some LEDs.”

“You could control it with an Arduino.”

“You could run it on a Raspberry Pi.”

“You can use open source software for that.”

“You could 3d print the parts.”

“You can use the laser cutter to make those parts.”

“You can use the CNC router for that.”

hack.RVA

The Richmond area’s only real maker space, a collective of makers, builders, hackers (the good kind), coders, and lovers of cool tech. We share our knowledge, and we have some awesome tools. Come down any Thursday night for a tour, or just to talk techy with us.
